To whom it may concern,

I have had the pleasure of working with Thom Parkin for over 10 years on the System Engineering and Integration Contract for Leidos. I have worked with him initially as a peer and then later on as his direct supervisor.

In both situations I was impressed by his dedication to his work and ability to look at things from outside the box. Thom focus on tasking and ability to support new tasks quickly was highlighted in his day to day activities. Thom would come in each day with a great attitude and help foster a team environment among his co-workers.

Thom was also one of the few engineers on my team to whom I could assign a task and he would require very limited manager oversight. Thom had a keen ability to pull together a group of engineers to collaborate on a complex problem. Thom's personality allows him to quickly work with and mentor more junior engineers as well.

Thom will bring a wealth of experience to many different positions and would also be a great fit for many different positions. If you have any questions, please contact me at the above phone number.

Sincerely,

Shaun Scott

System Integration Lab Site Lead
